

CONFERENCE REVIEW

ANASTASIA PANKRATOVA

Third-year student of the Faculty of Law
of the “TISBI” University of Management

**THE RESULTS OF THE STUDENT SCIENTIFIC SOCIETY OF THE “TISBI”
UNIVERSITY OF MANAGEMENT FOR THE 2022 ACADEMIC YEAR**

DOI 10.30729/2541-8823-2022-7-4-163-167

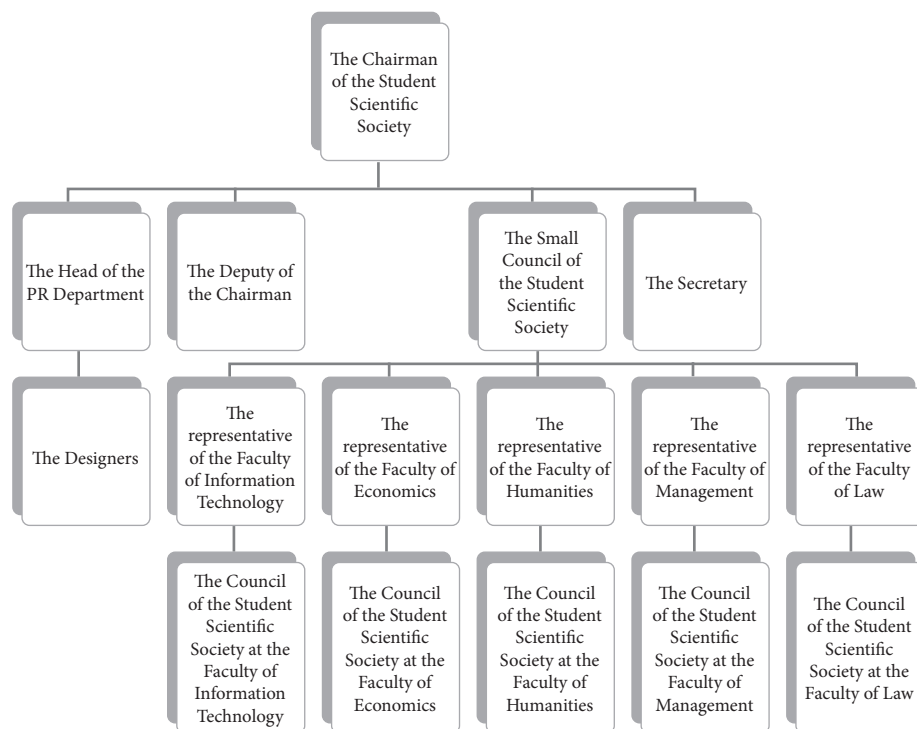

Abstract. *The following aspects of the activities of “Logos” Student Scientific Society of “TISBI” University of Management have been considered by the author in the research work: conceptual apparatus of this student self-government, its structure and structural units, goals, and objectives of “Logos” Student Scientific Society in the course of its activities, as well as the role of the organization and its impact on the life of the students of “TISBI” University of Management. Particular attention is paid to the activities that the youth association carried out as a result of the implementation of its activities. This includes not only the standard activities for many Student Scientific Societies, but also activities contributing to the intellectual development, improvement of student literacy, and improvement of his oratorical and personal qualities. Since the new academic year, “Logos” Student Scientific Society has been actively developing cooperation with other institutions of higher education as well as with companies, for example, charity meetings with the “Shelter of Man” Rehabilitation Center. In addition, the Student Scientific Club “Illumination” began to function. During the activity of this structural unit of Student Scientific Society meetings with famous scientists not only of the Republic of Tatarstan, but also of the Russian Federation are held, scientific works of bachelors, masters and graduate students are discussed, round tables are held.*

Keywords: *student self-government, student scientific society, science, studentship.*

The “Logos” Student Scientific Society is a community of like-minded people actively involved in research, organizational, and creative work.

Our aim is to make student life even more interesting. Many students do not know where to find information about conferences, where and how to publish their research papers and articles, and, of course, how to receive scholarships and other incentives for their scientific work. Our program promotes the all-round development of a student's personality. We create favorable conditions for each student who wants to realize his intellectual abilities through participation in scientific conferences, debates, intellectual games.

The structure of the Student Scientific Society includes the following units: The Chairman of the Student Scientific Society, The Deputy of the Chairman, The Secretary, The Small Council of the Student Scientific Society, and The Big Council. The Small Council consists of the Chairman and representatives of all faculties of the “TISBI” University of Management. The Big Council consists of the members of the Councils of the faculties. The structure is presented in more details in the scheme:

At each faculty of the University and in the branches there are 1–2 Scientific Circles. And within the whole university Student Scientific Club “Illumination” actively works.

Activities of Student Scientific Circles and Student Scientific Society in general are aimed at increasing the involvement of students to take part in research and innovation activities, promoting science and its role in the student community, establishing and maintaining relationships with the Student Scientific Societies of other universities. However, it does not replace the traditional academic research and scientific work within the academic plan.

The aims of the university-wide Student Scientific Society are as follows:

1. To increase and maintain students' motivation to engage in research and innovation activities.
2. Creating additional opportunities for the scientific development of students.
3. Creating in the University a single university-wide scientific space.
4. Development of Students Scientific Societies in the structural or thematic subdivisions.
5. Establishing and expanding connections with Student Scientific Societies of other Universities.

Student Scientific Society “Logos” holds many events that contribute not only to the scientific, but also the intellectual development of the students of the University, among them:

House of Scientific Culture. The House of Scientific Culture is a complex of events aimed at attracting students of the University to scientific activities. The House of Scientific Culture offers lectures, trainings, and seminars where participants gain important insights into the student science system. Guest speakers try to tap into everyone's potential in order to improve the quality of young scientists' research.

Debate. This is a discussion between students on a particular topic. It takes place every two months. The topics for this event are quite diverse: from all areas of society.

Mind Games. Students Scientific Society “Logos” holds “What? Where? When” game and different quizzes on a constant basis.

Literary Club. This is an event where students discuss famous works from the world of literature. This is a brand-new event at “TISBI” University of Management. For the first time, it was held on October 25.

Science Slam. It is a competition in the form of short speeches of scientists and students telling about their scientific research in a popular science form.

Roundtable. A modern form of public discussion or coverage of any issue where equal participants take turns or speak in a specific order.

Model Trial. A simulated court session takes place in which students present a position on a legal dispute to judges, playing against representatives of the opposing team-also students.

Sponsored events. The “Logos” Student Scientific Society actively cooperates with the “Drive” driving school, the “Shelter of Man” rehabilitation and adaptation center, Dmitry Khudyakov, as well as with Ak Bars Bank.

Alexey Gryaznov, Doctor of Psychological Sciences, Deputy Vice-Rector for Science, Professor of the Department of Pedagogy and Psychology of the “TISBI” University of Management, Academician of the International Academy of Psychological Sciences, Head of the Regional Branch of the International Academy of Psychological Sciences in the Republic of Tatarstan, commented on the activities of “Logos” Student Scientific Society: “Thirty years ago the Student Scientific Society was created at the “TISBI” University of Management under the initiative and personal guidance of Nella Pruss, which acquired Student Scientific Society made it possible to transfer to a higher form of organization of students' scientific and research work contributing to further development of creative activity and scientific upbringing of students. Goals and objectives of the university-wide student scientific society, in the development of student self-government in the research sphere, are defined. Student scientific society is understood as a voluntary and open association of students engaged in research and innovation activities. Association of students can take place on a number of factors: from the thematic focus of research to the affiliation of students to a particular structural unit of the University. The organization of the work of the Student Scientific Society is carried out independently by the members of the student scientific activists”.

Below are the statements of the students of the “TISBI” University of Management about the recent events held by the Student Scientific Society “Logos”:

Gleb Demin, student: “I really liked the training “House of Scientific Culture” held by the Student Scientific Society of our University. Even as a third-year student, I discovered new and interesting details, which will undoubtedly help me to write better and higher quality research papers. I am grateful to the activists for sharing their experience with other students”.

Semen Shabanov, student: “I especially liked the trainings, there was a lot of useful information and practical examples of scientific papers, the stages of writing scientific papers were clearly and competently described. Thanks to this training, I learned the structure of scientific papers”.

Shamil Kamalitinov, student: “The debates were very informative. It creates a mood for further advancement and development. I wish the organizers successful events in the future”.

Nikita Dementiev, student: “The debates were interesting and, most importantly, competitive. It's worth noting that we have improved some points, corrected some problems, and overall the level of organization has risen. In the future, I would like this direction to develop and become only better”.

Bulat Mavzyutov, student: “Being a freshman, I never participated in debates in the past, it was interesting to try. It was an unbelievable experience that I really want to try again. I express my gratitude to all the organizers and participants”.
